Source: Statistics Canada, CANSIM table 051-0001

Note: Postcensal estimates are based on the 2006 census counts adjusted for net census undercoverage and for the estimated population growth that occurred since that census. Intercensal estimates are based on postcensal estimates and data adjusted for net census undercoverage of the censuses preceding and following the considered year. Population estimates for July 1 are final intercensal from 1996 to 2005, final postcensal for 2006, updated postcensal for 2007 and preliminary postcensal for 2008.

As of July 1, 2008, the total population in Nunavut was estimated at 31,448, an increase of 197 people or 0.6% from a year ago. Although there were more males than females in July 2008, the female population increased more rapidly than their male counterparts from July 2007 to July 2008.

Nunavut has a young population. In July 2008, an estimated 10,322 people were under the age of 15, representing a third of the territory's population. However, a number of older age groups saw stronger population increase from July 2007 to July 2008.

4

Historical Population Estimates

Since 2000, Nunavut's population has been steadily increasing, although at a different pace. The population growth rate has declined steadily since 2000.

Nunavut Population, July 1, 2000 to 2008

Year	Population	% Change from previous year
2008	31,448	0.6
2007	31,251	1.5
2006	30,799	1.6
2005	30,328	1.6
2004	29,854	1.8
2003	29,320	1.7
2002	28,819	2.4
2001	28,134	2.3
2000	27,498	2.5
